

SUMMARY

Motivated B.Tech Computer Science final year student with hands-on exposure to **Cybersecurity, Ethical Hacking, Python Programming, Linux, Networking, and Security Fundamentals**. Completed internships in **Ethical Hacking and Cybersecurity** and **Python Programming**, gaining practical exposure to cybersecurity concepts, security-oriented problem solving, Python scripting, automation, and network-related tasks. Strong foundation in **Cybersecurity Fundamentals, Network Security, Vulnerability Assessment, Authentication, Access Control, Web Security, Secure Coding, and Information Security**. Proficient in Python, Bash, SQL, Git, and Linux with knowledge of **TCP/IP, DNS, HTTP/HTTPS, OSI Model, common network protocols, and basic security practices**. Familiar with security tools, threat awareness, incident analysis concepts, and developing security-focused Python scripts. Seeking opportunities in **Cybersecurity, SOC, Security Analyst, Ethical Hacking, Vulnerability Assessment, and Information Security** roles.

EDUCATION

B.Tech in Computer Science and Engineering
Jagan Nath University, Jaipur

2023 – 2027
CGPA: 7.5

TECHNICAL SKILLS

- Cybersecurity:** Cybersecurity Fundamentals, Information Security, Network Security, Ethical Hacking, Vulnerability Assessment, Security Assessment, Threat Awareness, Security Best Practices, Secure Coding
- Ethical Hacking & Web Security:** Ethical Hacking Fundamentals, Reconnaissance, Vulnerability Identification, Authentication, Access Control, Password Security, Web Security Fundamentals, Common Web Vulnerabilities, Security Testing Fundamentals
- Networking:** TCP/IP, OSI Model, DNS, HTTP/HTTPS, IP Addressing, Ports, Network Protocols, Network Troubleshooting, Basic Network Security, Network Device Fundamentals
- Operating Systems:** Linux, Windows, Linux Command Line, File Permissions, Processes, Users and Groups, Shell Environment, System Administration Fundamentals
- Programming & Scripting:** Python, Bash, SQL, C, C++, JavaScript, Automation Scripting, Secure Scripting, File Handling, Exception Handling, Debugging
- Security Programming:** Python for Cybersecurity, Password Security, Password Strength Analysis, Credential Management, Encryption Fundamentals, Hashing Fundamentals, Regular Expressions
- Security Concepts:** CIA Triad, Authentication, Authorization, Access Control, Least Privilege, Encryption, Hashing, Security Policies, Risk Awareness, Data Protection
- Database & Data:** SQL, DBMS, CRUD Operations, Database Fundamentals, Data Validation, Structured Data Handling
- Tools & Platforms:** Linux Terminal, Git, GitHub, VS Code, Jupyter Notebook
- Core Computer Science:** OOP, Data Structures, Algorithms, Operating Systems, Computer Networks, DBMS, Problem Solving, Software Development Fundamentals

PROJECTS

Password Manager

Python, OOP, Encryption, File Handling, CLI

- Developed a Python-based password manager to securely store, retrieve, and delete user credentials.
- Implemented encryption to protect stored credentials and prevent unauthorized access.
- Added master password authentication to restrict access to stored password records.
- Built a command-line interface (CLI) supporting credential addition, viewing, searching, and deletion.
- Applied object-oriented programming, file handling, input validation, and exception handling to create structured and maintainable code.

Student Management System

Python, Data Handling, File Handling

- Built a Python application for managing student records with add, update, delete, search, and display operations.
- Implemented structured data handling and validation logic to maintain reliable student records.
- Applied Python programming concepts, functions, conditional logic, loops, and exception handling.
- Designed reusable program components to simplify data processing and improve maintainability.
- Implemented file-based data storage for persistent record management.

Password Strength Analyzer

Python, Security Scripting, Data Validation

- Developed a Python-based password analysis tool to evaluate password strength using multiple security and validation checks.
- Implemented pattern detection, character-type validation, repeated-character detection, sequential-pattern detection, and password entropy analysis.
- Applied Python functions, conditional logic, string processing, and data structures to build modular analysis components.
- Generated actionable feedback to help users create stronger and more secure passwords.

INTERNSHIP EXPERIENCE

Cisco Networking Academy — Cybersecurity InternJun 2025 – Sep 2025

India

- Gained hands-on exposure to **cybersecurity fundamentals, network security, vulnerability assessment, and authorized penetration testing**.
- Performed security testing in authorized environments and analyzed potential **network and application vulnerabilities**.
- Developed familiarity with security assessment workflows, reconnaissance, vulnerability identification, and security documentation.

Cisco Networking Academy — Python Programming InternJun 2024 – Sep 2024

India

- Developed Python scripts for **automation and basic network-device related tasks**.
- Applied Python programming concepts including **functions, control flow, data handling, and scripting**.
- Practiced automation-oriented problem solving and structured script development.

VaultofCodes — Ethical Hacking and Cybersecurity InternJun 2026 – Aug 2026

India

- Completed a **2-month internship** focused on **ethical hacking and cybersecurity**.
- Gained practical exposure to **cybersecurity concepts, ethical hacking practices, and security fundamentals**.
- Applied security-oriented problem solving and developed an understanding of **common cybersecurity techniques and practices**.

CERTIFICATIONS

- Google Cybersecurity Certificate** — Google
- Cyber Security Essentials** — Cisco Networking Academy
- Python Programming Essentials** — Cisco Networking Academy
- Ethical Hacking and Cybersecurity Intern** — VaultofCodes
- Command Line in Linux** — Coursera

COURSEWORK

Cybersecurity Fundamentals — Ethical Hacking — Network Security — Computer Networks — Operating Systems — Python Programming — Data Structures & Algorithms

LEADERSHIP & EXTRACURRICULAR

ANVL — Senior Video & Photo EditorMar 2020 – Jul 2023

Munger, India

- Led video and photo editing activities while maintaining quality and timely delivery of assigned work.
- Provided guidance and mentorship to junior team members on editing workflows and project requirements.
- Collaborated with team members to coordinate creative tasks and meet project deadlines.
